

for loops:

for(init ; boolean ; increment or
index true if decrement
you want index)
to
keep
going 1

cards.size()-1
from 23 down to 4

for (int i = 23; i >= 4; i--)

differences:

① test: int[]
int[] values

Deck: List<Card>
List<Card> cards

② int
primitive

Card
object

List: methods
Card: methods
